

2017 Postgraduate Health & Social Practice

*TO RESEARCH - KI TE RANGAHAU
THE EXPLORATION - KI TE PUPUKE TE HIRI*

LEADING BY EXAMPLE

At the heart of Wintec's Centre for Health and Social Practice is a team of experienced and respected practitioners, researchers and educators, delivering postgraduate programmes designed in response to the learning needs of regional and national health and social service professionals.

The Centre for Health and Social Practice takes a collaborative approach to learning that is leading the way, creating a positive interface between education and the health and social practice sectors. This innovative delivery of Health and Social Practice in New Zealand provides not only flexible options to gain the knowledge and skills you need to meet your career objectives, but also an environment that values compassionate action, inclusion and diversity.

Your World at Wintec	40
- Study made easy	
- Your well-being	
- Take your next step with Wintec	

LEADING BY REPUTATION

Who you study with, who you learn from, what resources are available to you, what employment links are established – these are important considerations when selecting where to undertake postgraduate study. Wintec provides dedicated resources for you. These include specialised workshops and a network of Practice Partners who are all highly qualified and respected practising professionals. You work on projects with the support of lecturers to make a real difference in practice, the community and the sector.

Our close association with Employer Partnership Groups ensures the programmes we deliver are constantly evolving and always relevant. It also means exciting career opportunities for you, regionally, nationally and internationally.

ANNA MASTROVICH

“The online forum offers rural nurses the opportunity to access and complete modules in their own time when shift work and family life allow. These papers are truly flexible with online support in a group forum. They are tailored to enhance your practice and prepare you for the future prescribing. I have been a Wintec graduate and understand the challenges of distance learning and have had input developing these modules to meet the needs of rural nurses and Wintec has an understanding of practice challenges in smaller communities as well as large centres. My Wintec Master’s degree has given me academic preparation to apply to clinical reasoning decisions on a daily basis and I hope to share this experience with you.”

JANE JEFFCOAT

“How often do students ask...“Why do we have to learn this?” ... Or ...“What relevance has this got to my work?” As a Practice Partner I contribute contextual knowledge to the students’ postgraduate learning experience, assisting them to apply academic knowledge to clinical practice. Theoretical concepts and differing world views are able to be explored in terms of relevance to practice as well as broadening the students’ vision. I have been a Practice Partner in Postgraduate Nursing since 2009. I also have first-hand experience of the nurturing learning environment Wintec uniquely provides to its students. Being a Wintec graduate means you have excellent academic preparation which can be applied in practice, a highly marketable commodity.”

A young woman with dark hair tied back, wearing a blue nursing uniform with teal accents, is smiling and holding a stack of papers. The background is a blurred indoor setting.

“Wintec has good postgraduate resources you can access, with internet you can work from anywhere. I enjoy learning about best practice, and presenting my research. It’s good to have a forum for discussion, and it makes you feel more fulfilled.”

WINTER

HOW TO GET THERE

PROGRAMME

POSTGRADUATE DIPLOMA IN NURSING

Duration: Starts February/July or one year full time equivalent

Study: Part-time

Location: Hamilton City Campus or Bay of Plenty District Health Board Education Centre, Tauranga

Applications: Close in December or June (late applications may be considered)

Exit Qualification: Postgraduate Certificate in Nursing on successful completion of 2 modules

PROGRAMME INFORMATION

This programme provides Registered Nurses with the opportunity to extend their clinical knowledge and skills in a specific area of practice. It consists of four modules:

- Two core modules
- Two practice modules covering a range of specialty practice areas

POSTGRADUATE CERTIFICATE

After successfully completing any two postgraduate nursing modules you may choose to exit with a Postgraduate Certificate in Nursing. You can then return to complete the Postgraduate Diploma in Nursing at a later date, provided this is within four years of your first enrolment in the Postgraduate Diploma in Nursing.

RELEVANT LEARNING

You are taught by staff who are currently active in practice and research, who take an interprofessional approach to teaching and who provide you with feedback. Modules are accessible, success-orientated and immediately relevant to practice and new models of care.

INDUSTRY SPECIALISTS

The Centre for Health and Social Practice model of the simultaneous delivery of clinical and theoretical knowledge enables praxis and practice development. We regularly invite scholars and guest lecturers to give presentations and discuss the latest research in your specialist area. A detailed workshop programme is put together every year for each module.

COMPUTER REQUIREMENTS

To access these web-enhanced or fully online modules, you are required to have access to/use:

- Windows 7 upwards
- Internet Explorer 9 upwards (or Chrome/Mozilla Firefox/Safari)
- Microsoft Office 2010 upwards
- Windows Media Player
- Adobe Acrobat Reader
- An Anti-Virus programme
- Updated Flash version for video on YouTube

Ensure your device has the latest Microsoft Windows or Mac updates installed.

MyLearning is not responsive for Tablets and Smartphones. To achieve the best experience use Moodle via learning.wintec.ac.nz, or use a PC or laptop that has the latest versions of operating system and software.

NEXT STEP

To enrol you must have an undergraduate Nursing degree or equivalent, hold a current New Zealand Practising Certificate as a Registered Nurse, and have completed six months of full-time post-registration clinical experience within the past five years. For more information:

www.wintec.ac.nz/courses/enhance/pages/index.aspx or to contact us.

COMPULSORY

INTEGRATED SCIENCE AND ASSESSMENT NURS801

Duration: One semester

Credits: 30

Level: 8

Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga

Dates*: Tauranga Semester 1
9, 10 February, 16, 17 March,
20, 21 April, 25, 26 May
Hamilton Semester 2
20, 21 July, 24, 25 August, 28,
29 September, 26, 27 October

OVERVIEW

This module aims to prepare registered nurses to develop advanced understanding of pathophysiology in complex health states. The integration of bioscience at cellular level, scientific evidence, empirical knowledge, comprehensive health assessment and clinical reasoning facilitates the identification of actual and potential health needs in specific communities and populations.

LEARNING OUTCOMES

- Demonstrate advanced physical assessment techniques and skills using a systematic and reasoned approach.
- Critically evaluate epidemiological data in relation to disease processes in specific populations.
- Critically analyse diagnostic test results, microbiology, biochemistry and comprehensive assessment data and synthesise knowledge to develop differential diagnoses.
- Integrate and articulate advanced knowledge in anatomy, physiology and pathophysiology to underpin comprehensive health assessment.
- Apply critical reasoning to develop an evidence based therapeutic plan of care in collaboration with the client and the inter-professional team.

CORE

REASONING IN PRACTICE NURS802

Duration: One semester

Credits: 30

Level: 8

Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga

Dates*: Hamilton Semester 1
9, 10 February, 16, 17 March,
27, 28 April, 1 June
Tauranga Semester 2
13, 14 July, 17, 18 August, 5, 6
October, 2 November

OVERVIEW

This module aims to foster the development of reflexive practitioners who critically evaluate clinical knowledge, research evidence, professional values and regulatory frameworks for reasoning in practice. It aims to cultivate inquiring and thoughtful nurses, as practitioners who collaborate with clients, communities and other health and social service professionals within the interprofessional contexts of practice.

LEARNING OUTCOMES

- Critically examine frameworks for clinical reasoning, and evaluate knowledge and evidence for professional practice and research.
- Engage in case reviews to reflect on the scientific, normative and professional values and evidence that underpin reasoning in practice.
- Critically evaluate the regulatory frameworks for specific scopes and areas of practice.
- Critically examine the influence of interprofessional communities of practice with specific populations.
- Identify strategies and opportunities to develop the professional self-as-practitioner within interprofessional contexts.

TE WHIRIWHIRI ORANGA MĀORI (THE WEAVING OF WELL-BEING) NUPCD02

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
13, 14 February, 13, 14 March,
1, 2 May (subject to sufficient
enrolments)

OVERVIEW

The focus of this module is to explore, critically analyse and weave customary/contemporary Māori models of health, well-being and caring. An understanding of the Crown's position on the health and well-being of Māori is included.

You will develop an innovative framework for nursing practice in an interprofessional context informed by the gathering, thinking and critiquing of the tikanga/ethical nature of nursing practice.

LEARNING OUTCOMES

- Critically analyse customary and contemporary Māori paradigms of well-being and caring.
- Critically analyse nursing practice and its application to weave the well-being of Māori.
- Critique key Crown documents and research evidence which respond to evolving patterns of Māori well-being.
- Develop an innovative framework for practice in an interprofessional context.

COMPULSORY - REGISTERED NURSE PRESCRIBING

PHARMACOLOGY FOR NURSING PRACTICE NURS804

Duration: One semester
Credits: 30
Level: 8
Location: Fully online including online exam
Date*: Semester 1
7 February

PREREQUISITE

B pass or better in NURS801 Integrated Science and Assessment.

OVERVIEW

This module is designed to enable registered nurses to develop and apply principles and concepts of clinical pharmacology to specific health care contexts.

You will develop an in-depth understanding of pharmacotherapeutic principles, including pharmacokinetics and pharmacodynamics, along with the regulatory/legislative frameworks, interprofessional relationships and evidence bases that facilitate clinical preparation for prescribing in advanced nursing practice roles.

LEARNING OUTCOMES

- Critically examine the interprofessional, professional, and regulatory contexts and evidence base for prescribing in advanced nursing practice.
- Critically evaluate knowledge for prescribing practice including physiology, pathophysiology, health assessment and clinical reasoning skills, and risk benefit assessments for therapeutic approaches with specific clients.
- Demonstrate advanced knowledge of pharmacotherapeutics and its application in prescribing medications, including pharmacokinetic and pharmacodynamic principles, and recognition of actual or potential interactions and contraindications, to aid safe prescribing.
- Demonstrate reflexive and relational practice in collaborating with clients/families to develop therapeutic plans and the educational strategies to improve access, safety and efficacy of prescribed medications, appliances or treatments.
- Articulate strategies to evaluate therapeutic plans according to client responses and biological markers, manage adverse reactions and collaborate with or refer appropriately to other members of the interprofessional health team.

REGISTERED NURSE PRESCRIBING PRACTICUM NURS806

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
14, 15 February, 28 March,
3, 4, May
Semester 2
11, 12 July, 15 August,
26, 27 September

PREREQUISITE

B pass or better in NURS801 Integrated Science and Assessment, NURS804 Pharmacology for Nursing Practice and NURS812 Advanced Practice in Long-term Conditions.

OVERVIEW

This practicum aims to consolidate previous learning and support the development of reflexive nurses who consistently evaluate clinical knowledge, research evidence, and regulatory frameworks for prescribing in common and long term conditions.

The practicum will enable registered nurses to apply their advanced develop knowledge and skills for prescribing and meet the Nursing Council of New Zealand competency requirements for prescribing in long term and common conditions.

LEARNING OUTCOMES

- Utilise scientific, legal, ethical and professional frameworks and evidence that underpin clinical reasoning and judgement for prescribing in practice.
- Demonstrate advanced health assessment, diagnostic decision making and clinical reasoning skills, recognising the significance of client contextual data including current drug therapies.

- Apply knowledge of pharmacotherapeutics and its evidence base for safe prescribing practice including pharmacokinetic and pharmacodynamic principles and recognition of interactions and contraindications.
- Effectively collaborate with the health team to make safe prescribing decisions in planning interventions with clients and families including prescribing medications or appliances.
- Critically evaluate therapeutic plans and manage responses to drug therapy including adverse drug reactions and interactions, and situations of drug misuse.
- Understand and comply with the regulatory requirements for prescribing, including writing prescriptions.

Special conditions apply, check programme regulations
<http://www.wintec.ac.nz/courses/files/PGDipNursing-regulations.pdf>

OPTIONAL

ADVANCED DIABETES NURSING PRACTICE NURS807

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
13, 14 February, 13,
14 March, 8, 9 May

OVERVIEW

This internationally-recognised practice module fosters an approach to learning about management of long-term conditions that supports critical inquiry and clinical reasoning in the specialty practice of diabetes nursing in partnership with people and their whānau, families and communities to facilitate self-management.

Students will explore issues in the clinical management of diabetes using theoretical and evidence-based perspectives, and develop specialty nursing care strategies in a multi-disciplinary context to meet the challenges within the NZ health care environment. You may take this practice module as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

“Students get academic rigour from Wintec, and they also get a really good clinical grounding by having this collaboration. Expert practitioners come in and teach students practical hands-on knowledge that they can apply in their practice. Students get a solid real-life application of what diabetes management is actually like, which enables them to feel much more confident.”

Bryan Gibbison

Nurse Practitioner and Wintec Practice Partner

LEARNING OUTCOMES

- Explore epidemiological and social determinants of health and illness which contribute to diabetes.
- Critically evaluate frameworks for diabetes care management.
- Demonstrate proficiency in assessment, planning and evaluation of care within the context of therapeutic care delivery.
- Articulate in-depth knowledge of normal endocrine function, the pathology, and long-term complications of diabetes.
- Critically analyse the specialty knowledge that underpins the needs of different educational groups.
- Critique and utilise research and approaches to provide evidence-based care.
- Lead, influence and act as a change agent in practice development and quality improvement to improve health outcomes.
- Role models the implementation of the Treaty of Waitangi and works in a manner that the clients perceive as culturally safe.

ADVANCED CARDIAC NURSING PRACTICE NURS808

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
17, 18 July, 21 August,
5 October

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

It is designed for nurses working in cardiac care, catheter labs, cardiac rehabilitation or step down cardiology clinical areas and primary health care and primary care long-term conditions.

The module has been developed to enable you to advance your knowledge and skills in acute and long-term management of clients with cardiac disorders. You will explore nursing roles and relationships within interprofessional health care teams, and develop strategies to advance nursing knowledge and therapeutic skills to support patient self-management.

LEARNING OUTCOMES

- Demonstrate the development of advanced nursing knowledge in cardiac care.
- Evaluate and utilise diagnostic and therapeutic approaches for cardiac nursing.
- Demonstrate competence in advanced health assessment and therapeutic interventions with clients in cardiac care and/or primary health care.
- Develop strength-based educational approaches for health promotion, recovery and quality of life.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

OPTIONAL

ADVANCED NURSING PRACTICE IN BREAST CARE NURS809

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
16, 17 February, 20, 21 April

OVERVIEW

This module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

It is designed to enable registered nurses to advance their knowledge and skills for nursing practice to meet the health care needs of clients using breast care services. You will explore nursing roles and relationships within interprofessional breast care services, and develop strategies to advance nursing knowledge and therapeutic skills for a holistic approach to women's health.

LEARNING OUTCOMES

- Critically examine advanced nursing practice in breast care and women's health.
- Evaluate population health data and understand the implications of screening well populations.
- Evaluate and utilise diagnostic and therapeutic approaches for breast care nursing.
- Demonstrate competence in advanced health assessment and therapeutic interventions with clients in breast care and/or primary health care.
- Develop strength-based educational approaches for health promotion, recovery and quality of life.

ADVANCED NURSING PRACTICE IN WOUND CARE NURS810

Duration: One semester
Credits: 30
Level: 8
Location: Fully online
Dates*: Semester 1
7 February

PREREQUISITE

NURS801

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

It aims to prepare registered nurses as wound care practitioners and innovative leaders, to critically analyse and treat the complexities of wound care. It will foster the development of wound care practices at an advanced level within the registered nurse scope of practice. Students will synthesise scientific evidence and empirical knowledge to underpin clinical reasoning.

LEARNING OUTCOMES

- Critically examine wound care as an area of advanced practice within the context of New Zealand population health.
- Integrate advanced concepts of pathophysiology, etiology and clinical judgement to provide skilled nursing assessment for people with complex health needs.
- Critically evaluate current research and synthesise pharmacological, clinical, experiential and cultural knowledge to underpin wound care treatments that foster learning and changes for health and wellbeing.
- Develop professional leadership in advanced wound care nursing through innovative health care responses in partnership with colleagues, patients/families/whānau and communities.

NURSING PRACTICE WITH THE OLDER ADULT NURS811

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Hamilton, Semester 1
7, 8 February, 22 March, 23 May
Tauranga Semester 2
11, 12 July, 5, 6 September

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing, and/or the Master of Nursing.

It is designed to enable registered nurses to advance their knowledge and skills in critical gerontology. The module fosters an approach to learning that supports critical inquiry in this area of nursing practice. You will explore and deconstruct discourses of aging that limit the potential of nurses to work collaboratively with older adults within their specific contexts.

The expected outcome for you is the development of innovative health promoting practice development. The development will be informed by multiple ways of thinking and awareness of the deeply ethical nature of nursing practice.

LEARNING OUTCOMES

- Understand and incorporate knowledge of the diverse realities of older adults in their practice.
- Critically analyse and utilise health promoting approaches that enhance the well-being of older adults and family/whānau.
- Critically analyse and employ evidence-based research to inform practice development.
- Critically examine legal, ethical and professional responsibilities in practice with older adults.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

ADVANCED PRACTICE IN LONG-TERM CONDITIONS NURS812

Duration: One semester
Credits: 30
Level: 8
Location: Fully online
Dates*: Semester 2
17 July

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

It will enable nurses to develop advanced knowledge, skills and capability to work with people, families and whānau who are affected by one or more long-term conditions. Participants will critique and synthesise advanced knowledge of chronicity to gain an in depth understanding of the complexity of living with a long-term condition. In addition they will develop a deeper understanding of the relationships between people, systems, and the socio-political and cultural contexts that may influence the improvement and maintenance of health, wellbeing and quality of life.

LEARNING OUTCOMES

- Articulate an area of practice with people, populations and/or communities who are affected by one or more long-term conditions to enhance health outcomes and quality of life.
- Critically analyse theoretical models and conceptual frameworks and systems that shape practice in the management of long-term conditions.
- Integrate advanced knowledge of diagnostic reasoning and clinical judgement to develop innovative and personalised care approaches that address the complex needs of individuals, caregivers, whānau and families living with long-term conditions.
- Work interprofessionally and in partnership with others to create alliances that foster support and quality health care responses for populations and individuals experiencing long-term conditions.
- Consistently evaluate and develop own practice capability to ensure systems, research evidence and approaches used, improve health outcomes and client satisfaction in this complex area.

LEADERSHIP AND MANAGEMENT IN PROFESSIONAL PRACTICE I

HSIP801

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Tauranga Semester 1
16 February, 13, 14 March, 27 April
Hamilton Semester 2
27 July, 31 August, 1 September, 12 October

OVERVIEW

This module prepares students to critically analyse leadership and management practices in the context of a dynamic and culturally diverse interprofessional care environment. Students will be able to develop leadership opportunities and examine management skills and concepts in the context of their own practice environments.

LEARNING OUTCOMES

- Critically analyse leadership and management principles and practices within rapidly changing health and social service environments.
- Critically reflect upon and develop own leadership and management practice to ensure approaches used improve service delivery.
- Deliberate the legal and ethical accountabilities and obligations to the Treaty of Waitangi embedded in interprofessional leadership and management.
- Synthesise the theoretical and philosophical principles of team development.
- Initiate and plan change that will deliver quality improvements.

LEADERSHIP AND MANAGEMENT IN PROFESSIONAL PRACTICE II

HSIP802

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Hamilton Semester 1
23 February, 23, 24 March, 4 May
Tauranga Semester 2
3 August, 12, 13 September, 17 October

PREREQUISITE

HSIP801

OVERVIEW

This module aims to develop leaders as managers who are strategic thinkers. An opportunity will be provided for students to consolidate the quality risk and fiscal responsibilities in complex interprofessional contexts.

LEARNING OUTCOMES

- Deliberate and advocate the professional, legal, ethical, and organisational responsibilities associated with interprofessional practice management and leadership.
- Critique of interprofessional alliance models to facilitate integrated care.
- Critique strategies in leading the alignment of organisational objectives cognisant of the local, national and international initiatives.
- Utilise strategic thinking and planning to maximise the delivery of quality health care or social services practice.

OPTIONAL

FACILITATING LEARNING IN PROFESSIONAL PRACTICE

HSIP803

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
6, 7 March, 10 April, 12 June

OVERVIEW

The aim of this module is to support the development of the practitioner to make the transition to the role of an educator, responsive to the dynamic context of health care and social services, and to foster an identity as a reflexive educator.

LEARNING OUTCOMES

- Critically analyse theories of teaching and learning in the context of practice.
- Critique the relationship between principles of teaching and learning, and the relationship between teacher and learner.
- Critically analyse the knowledge and skills to facilitate teaching and learning in a specific context.
- Demonstrate competency in planning, facilitating, evaluating and assessing learning.
- Actively engage in reflexive teaching and learning to foster and role model life-long learning.

COACHING, MENTORING AND CLINICAL SUPERVISION

HSIP804

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
17, 18 July, 4 September,
30 October

OVERVIEW

The aim of this module is to prepare health professionals to skilfully coach, mentor and supervise other clinicians, in order to respond to the demands of health services. This module fosters knowledge and skill development for clinical education which will contribute to health workforce capability development. Participants will engage in critical thinking and reflexive learning activities that will enable them to practice as skilled coaches, mentors and clinical supervisors.

LEARNING OUTCOMES

- Articulate a philosophical and theoretical foundation for coaching, mentorship and clinical supervision in practice.
- Critique the frameworks of coaching and mentorship for clinical practice in the New Zealand health care context.
- Appraise the ethical and legal responsibilities and relational/organisational obligations associated with being a coach, mentor and clinical supervisor.
- Critique evidence based frameworks for evaluation of learning, and assessment of clinical competency.
- Facilitate collaborative interprofessional relationships for ongoing workforce capability development.

EVIDENCE AND INQUIRY IN PRACTICE HSIP805

Duration: One semester
Credits: 30
Level: 8
Location: Fully online
Dates*: Semester 2
24 July

OVERVIEW

This module develops the practitioner's ability to utilise concepts of evidence-based practice and critical inquiry that underpin advanced practice. The module focuses on locating and critically analysing the research evidence that guides reasoning and professional judgement within specific client situations and organisational contexts.

LEARNING OUTCOMES

- Interpret concepts of evidence-based practice and formulate researchable practice question/s using systematic methods.
- Apply systematic search frameworks, using appropriate media and technologies to search and retrieve information and document search processes.
- Critically appraise and synthesise research findings using appropriate methodological approaches for meta-analysis.
- Demonstrate reflexive awareness in addressing situational, political, cultural and other considerations for knowledge transfer in specific practice contexts.
- Develop evidence based resources to inform reasoning and decision making in practice.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

SPECIAL TOPIC

HSIP809

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
14 February, 19 April
Semester 2
1 August, 19 September

PREREQUISITE

NURS802 + one other 30-credit module

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or Master of Nursing. To be eligible for enrolment, you must have completed a minimum of a Postgraduate Certificate (60 credits) and currently be in practice.

This special topic module gives you the opportunity to study a particular area of interest related to nursing practice. You will negotiate with a lecturer to determine the scope of the project. Examples of special topics include a literature review, an in-depth essay or significant report.

It is desirable that a Wintec academic and an advanced nurse from your area of practice supervise the topic project conjointly.

LEARNING OUTCOMES

- Initiate and manage scholarly inquiry in relation to a chosen topic.
- Present an ordered, critical exposition of knowledge related to the selected topic.

PROFESSIONAL SUPERVISION 1

HSIP810

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Hamilton Semester 1
20, 21 February, 27, 28 March,
1, 2 May

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

In this module, you will develop knowledge and skills in supervision. You will define the scope of supervision in a variety of fields of practice. You will critically evaluate supervision in practice in professional, organisational, cultural, ethical and legal contexts. It aims to cultivate supervisors who can support, challenge and facilitate reflective learning in professional practitioners.

LEARNING OUTCOMES

- Critically analyse the nature and purpose of professional supervision in terms of its role, relationships, context, task and process.
- Locate supervision within professional and organisational contexts and activities.
- Critically examine the legal and ethical responsibilities in supervision.
- Apply theoretical concepts to supervision practice.
- Demonstrate competent supervisory skills which promote reflection, safe and ethical practice and professional growth and development in supervisees.
- Critically review supervision practice and provide feedback to others.

OPTIONAL

PROFESSIONAL SUPERVISION 2 HSIP811

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Hamilton Semester 2
31 July, 1 August, 11, 12
September, 16, 17 October

PREREQUISITE

Module HSIP810 is a prerequisite to this module.

OVERVIEW

This module is designed to develop you to a more advanced level of professional supervision practice. You will critically examine a range of supervision theories and approaches and develop a well-integrated supervision framework to inform your supervision practice.

This module aims to develop intentional supervisors who will facilitate critically reflective, restorative and accountable practice in practitioners. An opportunity will be provided for you to consolidate the role and further develop your identity as a supervisor able to work within a complexity of organisational and professional contexts.

LEARNING OUTCOMES

- Critically examine a range of theoretical and practical supervision approaches.
- Articulate and implement a personal style and integrative approach to supervision.
- Facilitate critically reflective practice and practice development in practitioners.
- Intentionally use the supervision relationship and manage the emotional affective content of supervision.
- Critically analyse specific organisational cultures and consider the impact on the nature and practice of supervision.
- Critique and research the evidence base to contemporary supervision practice.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

PALLIATIVE CARE HSIP813

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
15 February, 28, 29 March,
24 May

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing and/or the Master of Nursing.

It is designed to enable practitioners to advance their knowledge and skills in palliative care. The module fosters an approach to learning that supports critical inquiry in this area of practice. You will develop an understanding of the diverse contexts of palliative care and explore and deconstruct the discourses of chronic illness, death and dying.

The expected outcome for you is the development of innovative health-promoting practice development. The development will be informed by multiple ways of thinking and awareness of the deeply ethical nature of practice.

LEARNING OUTCOMES

- Understand and incorporate knowledge of the diverse realities of people experiencing palliative care.
- Critically analyse and utilise health promoting approaches that enhance the well-being of people and family/whānau.
- Critically analyse and employ evidence-based research to inform practice development.
- Critically examine legal, ethical and professional responsibilities in practice with palliative care.

HEALTH AND WELL-BEING IN THE PRIMARY HEALTH CARE AND COMMUNITY CONTEXT HSIP814

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
16, 17 February, 20, 21 April

OVERVIEW

This practice module may be taken as part of the Postgraduate Diploma in Nursing, and/or the Master of Nursing.

This interprofessional module is designed for nurses, health and social services practitioners whose practice aligns with the spectrum of primary health care.

It is designed to develop and enhance your practice using primary health care, community development and health promoting approaches to work with individuals, families/whānau and populations.

LEARNING OUTCOMES

- Deconstruct social, cultural, environmental and political ideologies that influence specific populations' capacities for maintaining, restoring and improving health and social care.
- Critically analyse primary health care models that guide practice and therapeutic relationships with individuals, families/whānau, communities and populations.
- Utilise theoretical models and evidence relevant to the determinants of health and wellness of practice contexts.
- Strategically discern and implement culturally safe, strength-based sustainable approaches to policy and practice development within the primary health care context.
- Explore multidisciplinary collaboration within health and social services to strengthen community action for innovative change.

"Through the Postgraduate study that I have completed at Wintec I have been able to obtain the position of Nurse Educator for Medical Services. I focused my studies on acute assessment, chronic disease management, cardiac and diabetes and I am now planning to concentrate my research on improving the management of COPD patients.

It has been great studying at Wintec. The flexibility of learning with a combination of e-learning, lectures and regionally delivered (including Tauranga) courses has minimised my travel. I have found the lecturers to be extremely supportive towards individual learners and available to discuss any study-related issues. Postgraduate study, full-time work, and managing a family are at times difficult to juggle; however, the support I have received from Wintec has made this possible. I highly recommend study at Wintec."

Louise Fowler

Master of Nursing Graduate

**MASTER OF
NURSING**

PROGRAMME

MASTER OF NURSING

Duration: Starts February/July for one year
Study: Full-time or Part-time equivalent
Location: Hamilton City Campus
Applications: Close in December or June (late applications may be considered)

OVERVIEW

This New Zealand Nursing Council approved Clinical Master of Nursing programme provides opportunities for role development in advanced nursing practice including Nurse Practitioner. It involves theoretical knowledge development as well as clinical and ethical learning experiences with an aim to building capacity to respond to increasingly diverse populations and complex health environments.

HOW YOU STUDY

You will be joined in critically reflexive discussions about practice by guest clinicians from nursing and other disciplines, as well as visiting scholars and Nurse Practitioners. Expert clinicians provide you with clinical mentorship that assists in consolidating and articulating advanced nursing practice, as well as presenting evidence of it as an electronic portfolio for practice.

COMPUTER REQUIREMENTS

To access these web-enhanced or fully online modules, you are required to have access to/use:

- Windows 7 upwards
- Internet Explorer 9 upwards (or Chrome/Mozilla Firefox/Safari)
- Microsoft Office 2010 upwards
- Windows Media Player
- Adobe Acrobat Reader
- An Anti-Virus programme
- Updated Flash version for video on YouTube

Ensure your device has the latest Microsoft Windows or Mac updates installed.

MyLearning is not responsive for Tablets and Smartphones. To achieve the best experience use Moodle via learning.wintec.ac.nz, or use a PC or laptop that has the latest versions of operating system and software.

FOCUS ON RESEARCH

The Centre for Health and Social Practice has a flourishing research culture. Excellence in research is achieved through adopting a holistic philosophy and pursuing an interprofessional and multi-method approach.

NEXT STEP

To enter this programme, you must have completed a Postgraduate Diploma in Nursing with a grade average of B or better, and have graduate nursing experience in the health sector demonstrated in a professional portfolio. For more information and full entry criteria visit www.wintec.ac.nz/courses/enhance/pages/index.aspx or to contact us.

There are three options for completing your Masters.

Option 1 – Nurse Practitioner

HSIP808	Research for Practice
HLNU902	Research Project
HLNU904	Advanced Nursing Practice
HLNU905	Prescribing Practicum

Option 2 – Advanced Nursing Practice

HSIP808	Research for Practice
HLNU902	Research Project
HLNU904	Advanced Nursing Practice and one optional practice module

Option 3 – Research Dissertation

HSIP808	Research for Practice
HLNU903	Dissertation

“I see it as an honour and a privilege to be a nurse. It was such a supportive environment, that set me up for what has been a versatile and rewarding career, and the continued support I get now from the Wintec nursing department, while I complete my Masters is so valuable. My job isn't just about helping people with their physical needs, it's also about being there for them emotionally and psychologically. I feel like I'm making a real difference in people's lives.”

Ellyn Proffit

Wintec postgraduate Master of Nursing student and Waikato District Health Board's Nurse of the Year 2016.

CORE

RESEARCH FOR PRACTICE

HSIP808

Duration: One Semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
25, 26 July, 22, 23 August,
19, 20 September

OVERVIEW

This module explores the knowledge, procedures, resources, issues and possibilities associated with research within health and/or social practice areas. It is designed to give an overview of the range of research approaches for practice inquiry, and provide the skills required for planning, conducting, writing and disseminating research.

LEARNING OUTCOMES

- Demonstrate critical exposition of conceptual, evidential and contextual bases for advanced practice knowledge within a health or social service.
- Articulate contextual, theoretical and methodological positionings for health or social service inquiry.
- Critically evaluate research outcomes relative to the research question(s) and claims made.

RESEARCH PROJECT

HLNU902

Duration: One semester
Credits: 30
Level: 9
Location: Hamilton City Campus
Dates*: Semester 1
2, 3, February, 23 March,
26 April

OVERVIEW

This module forms part of the Master of Nursing programme and is a core module for Option 1 and 2. This module focuses on the development of a supervised research project (30 credits) in which you will choose a specific issue related to their practice area. You will critically explore, analyse and articulate the findings that result from this enquiry.

LEARNING OUTCOMES

- Scope, initiate and manage a nursing research project within a practice area, including the presentation of a research project proposal.
- Critically examine and interpret literature and research assertions to support the significance and utility of the project and the methodological approach.
- Identify and manage ethical and cultural issues and considerations.
- Present an ordered, critical exposition of the research process and outcomes for publication.

DISSERTATION

HLNU903

Duration: 18 months (3 semesters)
Credits: 90
Level: 9
Location: Hamilton City Campus
Dates*: 2, 3 February, 26 April
two days in Semester 2
negotiated with Supervisor

OVERVIEW

This module forms part of the Master of Nursing programme and is a core module for Option 3. It focuses on the development of a supervised research dissertation that will contribute to advancing nursing knowledge in your area of specialisation. You will be expected to attend scheduled research schools through the duration of the dissertation. These will be negotiated with you to coincide with HLNU902 workshop dates. However, most work will be completed independently under the supervision of a suitably qualified academic staff member. Supervision will be negotiated between you and your supervisor. You will also complete a portfolio to demonstrate advanced nursing competencies.

LEARNING OUTCOMES

- Develop/further develop a proposal that will provide a strong structure to guide the dissertation.
- Initiate and manage a scholarly inquiry in relation to a nursing topic from practice.
- Critically analyse and identify paradigms, perspectives or methodologies that are appropriate for addressing research question(s).
- Review and critically analyse relevant published literature.
- Gather and analyse information, evaluate the evidence and synthesise conclusions in dissertation submission.
- Critically analyse the research.
- Produce an ordered presentation using an appropriate format identified for research dissemination.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

CORE

ADVANCED NURSING PRACTICE

HLNU904

Duration: One semester
Credits: 30
Level: 9
Location: Hamilton City Campus
Dates*: Semester 2
17, 18 July, 21 September,
19 October

OVERVIEW

This module forms part of the Master of Nursing programme and is a core module for Option 1 and 2. This module enables you to consolidate and articulate advanced nursing practice within your practice area. You will be mentored in presenting evidence of advanced nursing practice as a portfolio for the Nursing Council of New Zealand Nurse Practitioner Competencies (Non-prescribing).

LEARNING OUTCOMES

- Critically examine and articulate advanced nursing practice.
- Demonstrate advanced nursing practice within complex client situations and organisational systems.
- Demonstrate leadership in advancing nursing practice.
- Develop local policy initiatives and contribute to national health and other policies that impact on advanced nursing practice.
- Contribute to advanced nursing practice through clinical scholarship.

PRESCRIBING PRACTICUM

HLNU905

Duration: One semester
Credits: 30
Level: 9
Location: Hamilton City Campus
Dates*: Semester 1
14, 15 February, 2 March, 17
May, 8 June

PREREQUISITES

- Attain a B grade or above in NURS804 Pharmacology for Nursing Practice and NURS801 Integrated Science and Assessment modules.
- Current NCNZ Practising Certificate.
- Professional Indemnity Insurance.

OVERVIEW

This module forms part of the Master of Nursing programme and is a core module for Option 1. This module enables you to develop knowledge skills and competence for prescribing within your area of nursing practice.

During this practicum, you will be supervised by a designated prescriber and academic staff member, who will support your practice development towards achieving the requirements for Nursing Council of New Zealand Nurse Practitioner Scope of Practice (Prescribing).

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

LEARNING OUTCOMES

- Define and clearly articulate an area of advanced practice and understand the regulatory, legislative and professional frameworks that govern prescribing.
- Demonstrate advanced health assessment, diagnostic decision making and prescribing skills, recognising the significance of client contextual data including current drug therapies.
- Articulate advanced knowledge of pharmacotherapeutics and its evidence base for safe prescribing practice, including pharmacokinetic and pharmacodynamics principles and recognition of interactions and contraindications.
- Demonstrate advanced practice in planning interventions with clients and families, including prescribing medications or appliances within area of practice.
- Evaluate therapeutic plans and manage responses to drug therapy, including adverse drug reactions and interactions and/or appliances in collaboration with clients and families.
- Demonstrate understanding of how professional and organisation auditing processes influence prescribing practice.
- Critically appraise clinical trials, including relevant research methodologies.

“I liked the idea of being able to grow, develop and learn – I’m extremely curious. I wanted to continue my clinical nursing work but do some academic study as well. I chose to study the Masters of Nursing through the dissertation pathway, which allowed me to pursue academic research into nursing care of the long-stay surgical patient, an area of patient care I’m passionate about.”

Claire Notman

Master of Nursing Graduate - Clinical Nurses Specialist

Eugene Davis is a practice partner for the Professional Supervision Modules offered in the Postgraduate Certificate in Professional Supervision and the Postgraduate Diploma in Health and Social Practice.

“I do a lot of internal supervision, and I also provide external supervision to other practitioners in the counselling and social service fields.”

“Wintec has a nice supportive feel to its learning environment, and I hope to add to this support by strengthening the cultural component of the students’ learning.”

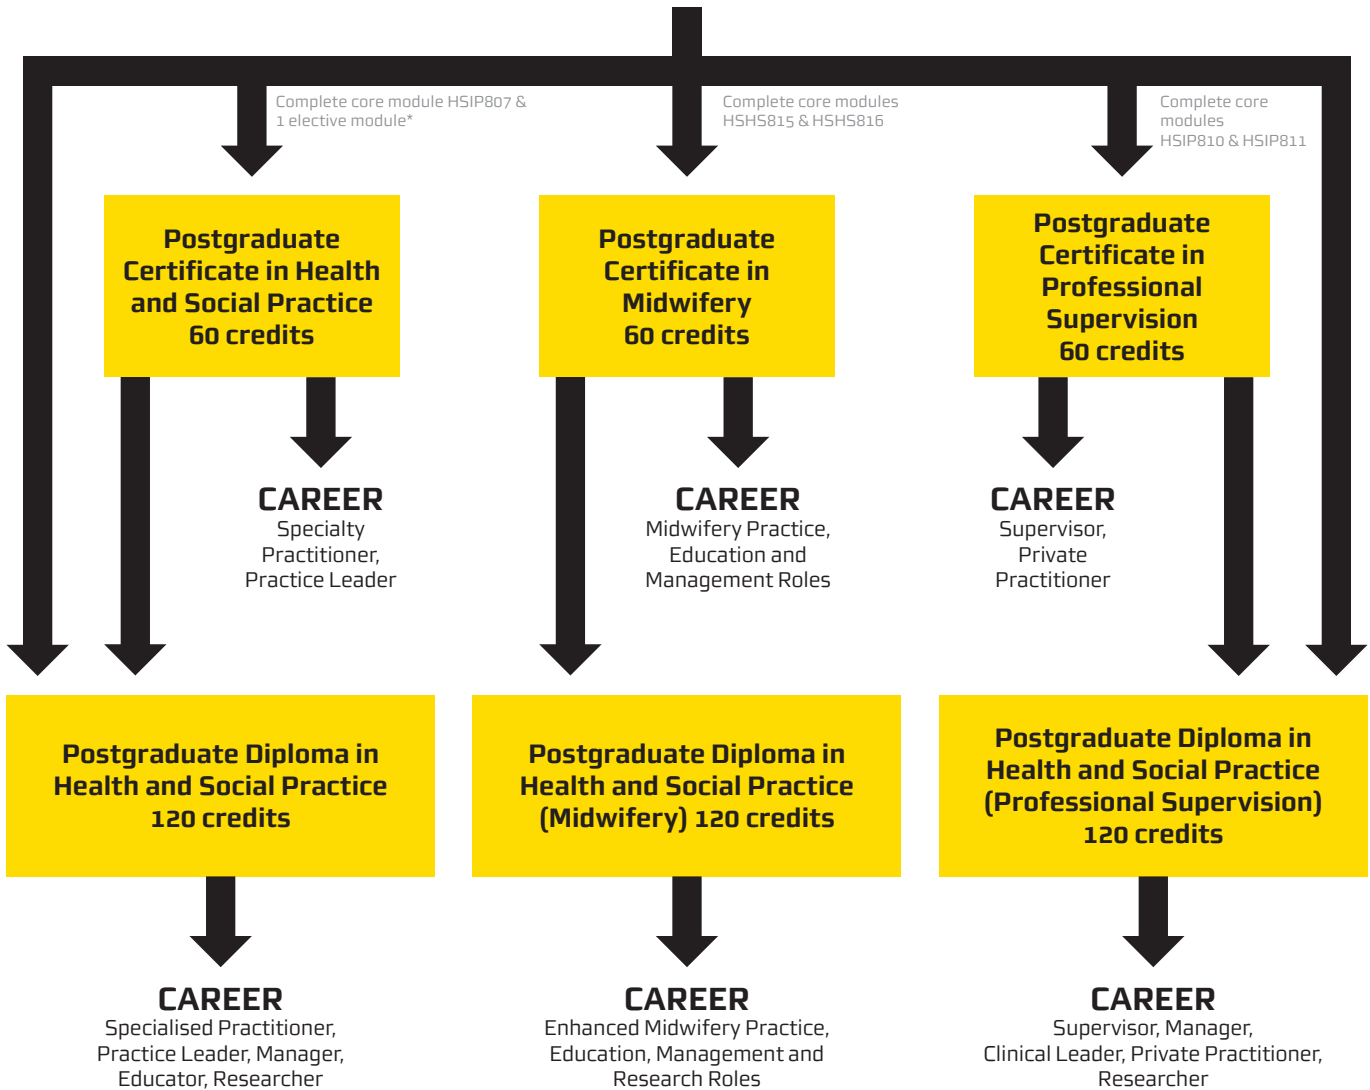

Eugene Davis
Wintec Practice Partner

HEALTH & SOCIAL PRACTICE

HOW TO GET THERE

ENTRY CRITERIA

An undergraduate degree in Health and/or Social Practice or related discipline or a suitable portfolio of experience.
 For Health and Social Practice and Professional Supervision – two years of practice experience and IELTS of 7 in all bands.
 For Midwifery – one year of practice experience, registered with Midwifery Council of New Zealand and a current Annual Practising Certificate.

POSTGRADUATE DIPLOMA IN NURSING

PROGRAMME INFORMATION

These programmes are designed for professionals in the fields of health and social practice which include: occupational therapy, social work, counselling, human services, nursing and midwifery. They offer learning opportunities designed to inform your practice and develop valued knowledge in Treaty-based practice. You will learn and grow professionally while undertaking interactive and experiential-based education alongside senior practitioners in health and social practice.

COMPUTER REQUIREMENTS

To access these web-enhanced or fully online modules, you are required to have access to/use:

- Windows 7 upwards
- Internet Explorer 9 upwards (or Chrome/Mozilla Firefox/Safari)
- Microsoft Office 2010 upwards
- Windows Media Player
- Adobe Acrobat Reader
- An Anti-Virus programme
- Updated Flash version for video on YouTube

Ensure your device has the latest Microsoft Windows or Mac updates installed.

MyLearning is not responsive for Tablets and Smartphones. To achieve the best experience use Moodle via learning.wintec.ac.nz, or use a PC or laptop that has the latest versions of operating system and software.

RELEVANT LEARNING

These programmes will extend the existing qualifications pathways and will allow higher level professional development that is interprofessional. It is relevant to practitioners from a wide range of practice contexts and the resulting interprofessional interaction of health and social services practitioners will enhance and strengthen service delivery in the region. These programmes are available to international students who may be overseas-qualified health or social services practitioners but may not be New Zealand registered. **These programmes will not lead to New Zealand Health or Social Service Professional Registration.**

INDUSTRY SPECIALIST

An interprofessional context will enable you to extend your capacity for critical and professional/clinical reasoning for specialist practice, leadership, education, management and supervision in complex professional environments.

MODULES

The core and elective modules for these programmes are on page 27. Some modules may be offered from the Bay of Plenty District Health Board Education Centre, Tauranga or online.

NEXT STEP

Entry into these programmes requires:

- An undergraduate degree in Health and Social Practice or a related discipline or a suitable portfolio of evidence.
- A minimum of two years of post-qualifying experience in your professional field of practice (or the equivalent as approved by the Postgraduate programme committee).
- An IELTS score of 7 in all bands.

See page 25 for entry criteria for the Midwifery programmes.

* See from page 28 for elective modules.

CORE

PROFESSIONAL PRACTICE IN CONTEXT

HSIP807

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Hamilton Semester 1 9,10 February, 16, 17 March, 27, 28 April. 1 June Tauranga Semester 2 13, 14 July, 17, 18 August, 5, 6 October, 2 November

OVERVIEW

This module aims to foster the development of a reflexive practitioner who critically evaluates the practice knowledge, research evidence, and normative values and regulatory frameworks that guide skilled professional practice in health and/or social services. It aims to cultivate inquiring and thoughtful practitioners who collaborate with clients, communities and other health and social service professionals within the interprofessional contexts of practice.

LEARNING OUTCOMES

- Critically examine knowledge perspectives for professional practice and research in health and social services.
- Engage in critical reflection to examine personal and professional values that underpin health and social practice.
- Critically examine the influence of interprofessional communities of practice with specific populations.
- Critically evaluate the normative values and regulatory frameworks for specific scopes or fields of professional practice.
- Identify strategies and opportunities to develop the professional self-as-practitioner within interprofessional contexts.

PROFESSIONAL SUPERVISION 1

HSIP810

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1 20, 21 February, 27, 28 March, 1, 2 May

OVERVIEW

In this module, you will develop knowledge and skills in supervision. You will define the scope of supervision in a variety of fields of practice and critically evaluate the Professional Supervision 1 module practice in professional, organisational, cultural, ethical and legal contexts. It aims to cultivate supervisors who can support, challenge and facilitate reflective learning in professional practitioners.

LEARNING OUTCOMES

- Critically analyse the nature and purpose of professional supervision in terms of its role, relationships, context, task and process.
- Locate supervision within professional and organisational contexts and activities.
- Critically examine the legal and ethical responsibilities in supervision.
- Apply theoretical concepts to supervision practice.
- Demonstrate competent supervisory skills which promote reflection, safe and ethical practice and professional growth and development in supervisees.
- Critically review supervision practice and provide feedback to others.

PROFESSIONAL SUPERVISION 2

HSIP811

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2 31 July, 1 August, 11, 12 September, 16, 17 October

PREREQUISITE

HSIP810 Professional Supervision 1

OVERVIEW

This module is designed to develop you to a more advanced level of professional supervision practice. You will critically examine a range of supervision theories and approaches and develop a well-integrated supervision framework to inform your supervision practice.

This module aims to develop intentional supervisors who will facilitate critically reflective, restorative and accountable practice in practitioners.

An opportunity will be provided for you to consolidate the role and further develop your identity as a supervisor able to work within a complexity of organisational and professional contexts.

LEARNING OUTCOMES

- Critically examine a range of theoretical and practical supervision approaches.
- Articulate and implement a personal style and integrative approach to supervision.
- Facilitate critically reflective practice and practice development in practitioners.
- Intentionally use the supervision relationship and manage the emotional affective content of supervision.
- Critically analyse specific organisational cultures and consider the impact on the nature and practice of supervision.
- Critique and research the evidence base to contemporary supervision practice.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

MIDWIFERY PRAXIS I

HSHS815

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
27, 28 February, 3, 4 April,
8, 9 May

OVERVIEW

This module will enable midwives to develop knowledge and capabilities to critically analyse own midwifery practice within situations of complexity. Midwives will critique the range of societal and epidemiological factors that influence midwifery care. Through reflexivity and critical review of research, and individual midwifery practice, the midwife will further develop and maximise their midwifery care.

LEARNING OUTCOMES

- Critically analyse social determinants and epidemiological factors of health which influence maternity care.
- Critically examine midwifery practice to analyse the challenges in detection and appropriate management of complexities, which may impact on maternity care.
- Consistently evaluate own practice knowledge and capabilities related to best practice evidence to enable a critical analysis of midwifery practice.
- Critically analyse the application of ethical and legal midwifery frameworks for practice, within the context of individual practice.

MIDWIFERY PRAXIS II

HSHS816

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
7, 8 August, 18, 19 September,
24, 25 October

PREREQUISITE

HSHS815 Midwifery Praxis I

OVERVIEW

This module will enable the midwife to develop knowledge and capabilities through critical, contextualised analysis of the complexities of midwifery practice. Midwives will critically reflect on the changing demographics of women and social infrastructure within society, which influence care provision. Using reflexivity and research, the midwife will influence and lead ways of working that progress service provision and the midwifery profession.

LEARNING OUTCOMES

- Critically analyse maternity care considering policies and legislation, and the application of the Treaty of Waitangi in post-colonial Aotearoa/ New Zealand.
- Demonstrate leadership in midwifery practice by critiquing research and policy and disseminate recommendation within the profession.
- Critically examine midwifery sustainability in practice to identify and disseminate innovative practice.
- Work interprofessionally to create alliances that enable advocacy and support for women and their babies

ELECTIVE

LEADERSHIP AND MANAGEMENT IN PROFESSIONAL PRACTICE I

HSIP801

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Tauranga Semester 1
16 February, 13, 14 March, 27 April
Hamilton Semester 2
27 July, 31 August, 1 September, 12 October

OVERVIEW

This module prepares students to critically analyse leadership and management practices in the context of a dynamic and culturally diverse interprofessional care environment. Students will be able to develop leadership opportunities and examine management skills and concepts in the context of their own practice environments.

LEARNING OUTCOMES

- Critically analyse leadership and management principles and practices within rapidly changing health and social service environments.
- Critically reflect upon and develop own leadership and management practice to ensure approaches used improve service delivery.
- Deliberate the legal and ethical accountabilities and obligations to the Treaty of Waitangi embedded in interprofessional leadership and management.
- Synthesise the theoretical and philosophical principles of team development.
- Initiate and plan change that will deliver quality improvements.

LEADERSHIP AND MANAGEMENT IN PROFESSIONAL PRACTICE II

HSIP802

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Hamilton Semester 1
23 February, 23, 24 March, 4 May
Tauranga Semester 2
3 August, 12, 13 September, 17 October

PREREQUISITE

HSIP801

OVERVIEW

This module aims to develop leaders as managers who are strategic thinkers. An opportunity will be provided for students to consolidate the quality risk and fiscal responsibilities in complex interprofessional contexts.

LEARNING OUTCOMES

- Deliberate and advocate the professional, legal, ethical, and organisational responsibilities associated with interprofessional practice management and leadership.
- Critique of interprofessional alliance models to facilitate integrated care.
- Critique strategies in leading the alignment of organisational objectives cognisant of the local, national and international initiatives.
- Utilise strategic thinking and planning to maximise the delivery of quality health care or social services practice.

FACILITATING LEARNING IN PROFESSIONAL PRACTICE

HSIP803

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 1
6, 7 March, 10 April, 12 June

OVERVIEW

The aim of this module is to support the development of the practitioner to make the transition to the role of an educator, responsive to the dynamic context of health care and social services, and to foster an identity as a reflexive educator.

LEARNING OUTCOMES

- Critically analyse theories of teaching and learning in the context of practice.
- Critique the relationship between principles of teaching and learning, and the relationship between teacher and learner.
- Critically analyse the knowledge and skills to facilitate teaching and learning in a specific context.
- Demonstrate competency in planning, facilitating, evaluating and assessing learning.
- Actively engage in reflexive teaching and learning to foster and role model life-long learning.

* For most recent dates go to www.wintec.ac.nz/courses/enhance/pages/index.aspx

COACHING MENTORING AND CLINICAL SUPERVISION

HSIP804

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
17, 18 July, 4 September,
30 October

OVERVIEW

The aim of this module is to prepare health professionals to skilfully coach, mentor and supervise other clinicians, in order to respond to the demands of health services. This module fosters knowledge and skill development for clinical education which will contribute to health workforce capability development. Participants will engage in critical thinking and reflexive learning activities that will enable them to practice as skilled coaches, mentors and clinical supervisors.

LEARNING OUTCOMES

- Articulate a philosophical and theoretical foundation for coaching, mentorship and clinical supervision in practice.
- Critique the frameworks of coaching and mentorship for clinical practice in the New Zealand health care context.
- Appraise the ethical and legal responsibilities and relational/organisational obligations associated with being a coach, mentor and clinical supervisor.
- Critique evidence based frameworks for evaluation of learning, and assessment of clinical competency.
- Facilitate collaborative interprofessional relationships for ongoing workforce capability development.

EVIDENCE AND INQUIRY IN PRACTICE HSIP805

Duration: One semester
Credits: 30
Level: 8
Location: Fully online
Dates*: Semester 2
24 July

OVERVIEW

This module develops the practitioner's ability to utilise concepts of evidence-based practice and critical inquiry that underpin advanced practice. The module focuses on locating and critically analysing the research evidence that guides reasoning and professional judgement within specific client situations and organisational contexts.

LEARNING OUTCOMES

- Interpret concepts of evidence-based practice and formulate researchable practice question/s using systematic methods
- Apply systematic search frameworks, using appropriate media and technologies to search and retrieve information and document search processes
- Critically appraise and synthesise research findings using appropriate methodological approaches for meta-analysis
- Demonstrate reflexive awareness in addressing situational, political, cultural and other considerations for knowledge transfer in specific practice contexts
- Develop evidence based resources to inform reasoning and decision making in practice.

RESEARCH FOR PRACTICE

HSIP808

Duration: One Semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
25, 26 July, 22, 23 August, 19,
20 September

OVERVIEW

This module explores the knowledge, procedures, resources, issues and possibilities associated with research within health and/or social service practice areas. It is designed to give an overview of the range of research approaches for practice inquiry, and provide the skills required for planning, conducting, writing and disseminating research.

LEARNING OUTCOMES

- Demonstrate critical exposition of conceptual, evidential and contextual bases for advanced practice knowledge within a health or social service.
- Articulate contextual, theoretical and methodological positionings for health or social service inquiry.
- Critically evaluate research outcomes relative to the research question(s) and claims made.

ELECTIVE

CARE OF THE OLDER PERSON

HSHS807

Duration: One semester

Credits: 30

Level: 8

Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga

Dates*: Hamilton Semester 1
7, 8 February, 22 March, 23 May
Tauranga Semester 2
11, 12 July, 5, 6 September

OVERVIEW

This module is designed to enable health and social service practitioners to advance their knowledge and skills in critical gerontology. The module fosters an approach to learning that supports critical inquiry in this area of practice.

You will explore and deconstruct discourses of aging that limit the potential of health and social service practitioners to work collaboratively with older adults within their specific contexts. The expected outcome for you is the development of innovative health promoting practice development. The development will be informed by multiple ways of thinking and awareness of the ethical frames for health and social service practice.

LEARNING OUTCOMES

- Understand and incorporate knowledge of the diverse realities of older adults in their practice.
- Critically analyse and utilise health-promoting approaches that enhance the well-being of older adults and family/whānau.
- Critically analyse and employ evidence-based research to inform practice development.
- Critically examine legal, ethical and professional responsibilities in practice with older adults.

PALLIATIVE CARE

HSIP813

Duration: One semester

Credits: 30

Level: 8

Location: Hamilton City Campus

Dates*: Semester 1
15 February, 28, 29 March,
24 May

OVERVIEW

This module is designed to enable practitioners to advance their knowledge and skills in palliative care. The module fosters an approach to learning that supports critical inquiry in this area of practice. You will develop an understanding of the diverse contexts of palliative care and explore and deconstruct the discourses of chronic illness, death and dying. The expected outcome for you is the development of innovative health promoting practice development. The development will be informed by multiple ways of thinking and awareness of the deeply ethical nature of practice.

LEARNING OUTCOMES

- Understand and incorporate knowledge of the diverse realities of people experiencing palliative care.
- Critically analyse and utilise health-promoting approaches that enhance the well-being of people and family/whānau.
- Critically analyse and employ evidence-based research to inform practice development.
- Critically examine legal, ethical and professional responsibilities in practice with palliative care.

HEALTH AND WELL-BEING IN THE PRIMARY HEALTH CARE AND COMMUNITY CONTEXT HSIP814

Duration: One semester

Credits: 30

Level: 8

Location: Hamilton City Campus

Dates*: Semester 1

16, 17 February, 20, 21 April

OVERVIEW

This interprofessional module is designed for health and social services practitioners whose practice aligns with the spectrum of primary health care. It is designed to develop and enhance your practice using primary health care, community development and health-promoting approaches to work with individuals, families/whānau and populations.

LEARNING OUTCOMES

- Deconstruct social, cultural, environmental and political ideologies that influence specific populations' capacities for maintaining, restoring and improving health and social care.
- Critically analyse primary health care models that guide practice and therapeutic relationships with individuals, families/whānau, communities and populations.
- Utilise theoretical models and evidence relevant to the determinants of health and wellness of practice contexts.
- Strategically discern and implement culturally safe, strength-based sustainable approaches to policy and practice development within the primary health care context.
- Explore multidisciplinary collaboration within health and social services to strengthen community action for innovative change.

PROFESSIONAL
PRACTICE**

PROGRAMME

MASTER OF PROFESSIONAL PRACTICE*

Duration: Starts February/July for one year
Study: Full-time or Part-time equivalent
Location: Hamilton City Campus
Applications: Close in December or June (late applications may be considered)

OVERVIEW

The Master of Professional Practice will assist practitioners in gaining advanced knowledge and skills to effectively manage the demands of rapidly changing and increasingly complex health and social care practice environments. It will enable you to participate effectively in the health or social practice workforce as highly skilled, knowledgeable and confident practitioners able to work across professional boundaries to respond to real world problems.

HOW YOU STUDY

The focus of learning in the programme will include working reflexively with clients and communities within differing interprofessional collaborations and relationships. It will enable you to engage in transformative learning strategies that build on the strengths, knowledge, skills and relationships acquired as experienced practitioners. This practice based learning approach will enhance your ability to engage in future professional and work related challenges.

COMPUTER REQUIREMENTS

To access these web-enhanced or fully online modules, you are required to have access to/use:

- Windows 7 upwards
- Internet Explorer 9 upwards (or Chrome/Mozilla Firefox/Safari)
- Microsoft Office 2010 upwards
- Windows Media Player
- Adobe Acrobat Reader
- An Anti-Virus programme
- Updated Flash version for video on YouTube

Ensure your device has the latest Microsoft Windows or Mac updates installed.

MyLearning is not responsive for Tablets and Smartphones. To achieve the best

experience use Moodle via learning.wintec.ac.nz, or use a PC or laptop that has the latest versions of operating system and software.

FOCUS ON RESEARCH

The Centre for Health and Social Practice has a flourishing research culture. Excellence in research is achieved through adopting a holistic philosophy and pursuing an interprofessional and multi-method approach.

NEXT STEP

To enter this programme, you must have a Bachelor degree in a health or social practice discipline with a grade average of B or better, and have a minimum of two years full time (or equivalent) of graduate experience in a health or social practice sector demonstrated in a professional portfolio. For more information and full entry criteria visit www.wintec.ac.nz/courses/enhance/pages/index.aspx or to contact us.

There are three pathways for completing your Masters:

Pathway 1 – Research in Practice

- HSIP807 Professional Practice in Context
 - HSIP903 Dissertation
- And two elective modules

Pathway 2 – Practice Development

- HSIP807 Professional Practice in Context
 - HSIP805 Evidence and Inquiry in Practice,
- or
- HSIP808 Research for Practice
 - HSIP902 Evidence-based Practice Project
 - HSIP904 Advanced Practice Development

And two elective modules

Pathway 3 – Industry-based Project

- HSIP807 Professional Practice in Context
- HSIP806 Designing Practice
- HSIP901 Industry-based Project

And two elective modules

ELECTIVE MODULES

- HSHS807 Care of the Older Person
- HSHS811 Transformative Praxis in Postcolonial Aotearoa New Zealand
- HSHS815 Midwifery Praxis I
- HSHS816 Midwifery Praxis II
- HSIP801 Leadership and Management in Professional Practice
- HSIP802 Leadership and Management in Professional Practice
- HSIP803 Facilitating Learning in Professional Practice
- HSIP804 Coaching, Mentoring and Clinical Supervision
- HSIP805 Evidence and Inquiry in Practice
- HSIP814 Health and Wellbeing in the Primary Health Care and Community Context
- HSIP808 Research for Practice
- HSIP809 Special Topic
- HSIP810 Professional Supervision 1
- HSIP811 Professional Supervision 2
- HSIP812 Care and Protection
- HSIP813 Palliative Care

An approved level 8 30 credit module from another Wintec postgraduate programme.

Note: Not all modules will be offered every year.

Refer to Postgraduate Diploma in Health and Social Practice for module descriptors.

*** Subject to NZQA approval.**

CORE

PROFESSIONAL PRACTICE IN CONTEXT HSIP807

Duration: One semester
Credits: 30
Level: 8
Location: Hamilton City Campus and Bay of Plenty District Health Board Education Centre, Tauranga
Dates*: Hamilton Semester 1 9,10 February, 16, 17 March, 27, 28 April. 1 June
Tauranga Semester 2 13, 14 July, 17, 18 August, 5, 6 October, 2 November

OVERVIEW

This module aims to foster the development of a reflexive practitioner who critically evaluates the practice knowledge, research evidence, and normative values and regulatory frameworks that guide skilled professional practice in health and/or social services. It aims to cultivate inquiring and thoughtful practitioners who collaborate with clients, communities and other health and social service professionals within the interprofessional contexts of practice.

LEARNING OUTCOMES

- Critically examine knowledge perspectives for professional practice and research in health and social services.
- Engage in critical reflection to examine personal and professional values that underpin health and social practice.
- Critically examine the influence of interprofessional communities of practice with specific populations.
- Critically evaluate the normative values and regulatory frameworks for specific scopes or fields of professional practice.
- Identify strategies and opportunities to develop the professional self-as-practitioner within interprofessional contexts.

PATHWAY COMPULSORY

EVIDENCE AND INQUIRY IN PRACTICE HSIP805

Duration: One semester
Credits: 30
Level: 8
Location: Fully online
Dates*: Semester 2 24 July

OVERVIEW

This module develops the practitioner's ability to utilise concepts of evidence-based practice and critical inquiry that underpin advanced practice. The module focuses on locating and critically analysing the research evidence that guides reasoning and professional judgement within specific client situations and organisational contexts.

LEARNING OUTCOMES

- Interpret concepts of evidence-based practice and formulate researchable practice question/s using systematic methods
- Apply systematic search frameworks, using appropriate media and technologies to search and retrieve information and document search processes
- Critically appraise and synthesise research findings using appropriate methodological approaches for meta-analysis
- Demonstrate reflexive awareness in addressing situational, political, cultural and other considerations for knowledge transfer in specific practice contexts
- Develop evidence based resources to inform reasoning and decision making in practice.

DESIGNING PRACTICE HSIP806

Duration: One Semester
Credits: 30
Level: 8
Location: Hamilton
Dates: Semester 2 18, 19 July, 29, 30 August, 26, 27 September

OVERVIEW

This module prepares students to respond innovatively to complex practice problems. Students will work through a real world practice problem, learning skills for working collaboratively in inter-professional teams to design creative responses to problems. The emphasis will be on service design.

LEARNING OUTCOMES

- Clearly identify the contributing factors to a complex practice problem.
- Understand the value base of the service provider's desired outcome.
- Work collaboratively within an interprofessional team.
- Develop methods for obtaining relevant information and processes for analysing the information in relation to the desired outcome.
- Collaboratively produce a prototype for the service provider and undertake a reflexive exploration of the process and outcomes of the project.

RESEARCH FOR PRACTICE

HSIP808

Duration: One Semester
Credits: 30
Level: 8
Location: Hamilton City Campus
Dates*: Semester 2
25, 26 July, 22, 23 August, 19,
20 September

OVERVIEW

This module explores the knowledge, procedures, resources, issues and possibilities associated with research within health and/or social service practice areas. It is designed to give an overview of the range of research approaches for practice inquiry, and provide the skills required for planning, conducting, writing and disseminating research.

LEARNING OUTCOMES

- Demonstrate critical exposition of conceptual, evidential and contextual bases for advanced practice knowledge within a health or social service.
- Articulate contextual, theoretical and methodological positionings for health or social service inquiry.
- Critically evaluate research outcomes relative to the research question(s) and claims made.

INDUSTRY-BASED PROJECT

HSIP901

Duration: Full Year
Credits: 60
Level: 9
Location: Hamilton
Dates: Not offered in 2017

PRE-REQUISITES

HSIP807 Professional Practice in Context
HSIP806 Designing Practice

OVERVIEW

This module enables experienced health and social practice practitioners to engage in industry-based activities to explore relevant and meaningful solutions for practice related challenges in their workplace. The industry-based project aims to support practitioners in building resilience and increased capacity within organisations and communities of practice. Reflexive learning activities will build on the practitioner's prior experience, using theoretical frameworks and research evidence to creatively respond to challenges in working with populations they serve. Evidence of industry-based learning will be presented as a report.

LEARNING OUTCOMES

- Identify an area of practice or service development with a specific health or social practice population or service
- Critically examine the potential for relevant and meaningful solutions to challenges within a specific professional, organisational or service context
- Develop a comprehensive project plan including project outcomes, and plans for ongoing capability development within the service or area of practice.
- Engage in professional supervision and mentoring relationships that foster own learning and career development
- Present a report representing the process of engaging in the industry-based project, including a reflexive analysis of the process of implementing and evaluating the project.

EVIDENCE BASED PRACTICE PROJECT

HSIP902

Duration: One Semester
Credits: 30
Level: 9
Location: Hamilton
Dates: Semester 1
2, 3 February, 23 March,
26 April

PRE-REQUISITES

HSIP807 Professional Practice in Context
HSIP805 Evidence and Inquiry in Practice
or HSIP808 Research for Practice

OVERVIEW

This module focuses on the development of a supervised evidence-based project in which students will choose a specific issue related to their area of practice. Students will critically explore, analyse and articulate the findings that result from this enquiry.

LEARNING OUTCOMES

- Scope, initiate and manage an evidenced based project within a specific area of practice.
- Critically explore transformative, evidence based approaches to managing practice problems and challenges.
- Construct and implement a methodological approach drawing on relevant conceptual frameworks and resources to inform the project.
- Evaluate primary research and other sources of evidence to inform solutions to practice problems.
- Present a critical exploration of the process and outcomes of the project for publication.

PATHWAY COMPULSORY

DISSERTATION

HSIP903

Duration: Three Semesters (18 months)
Credits: 90
Level: 9
Location: Hamilton
Dates: 2, 3 February, 26 April, two days in Semester 2 negotiated with Supervisor

PRE-REQUISITES

HSIP807 Professional Practice in Context

OVERVIEW

This module aims to guide students through the identification of a research topic, the construction of a research proposal, gaining ethical approval and conducting a major written project relevant to their field of practice. Students draw on learning and skills acquired in the taught components of the Master of Professional Practice programme to develop a scholarly piece of work that demonstrates skills in data collection, critical analysis and proficient written communication of ideas.

LEARNING OUTCOMES

- Discuss the philosophical theories that underpin research
- Critically analyse and identify paradigms and methodologies for practice inquiry that are appropriate to address their identified research question(s).
- Critically evaluate the ethical and cultural implications of research
- Plan, manage and document a substantial and logically structured inquiry as original research on a topic related to health or social practice.

ADVANCED PRACTICE DEVELOPMENT

HSIP904

Duration: One Semester
Credits: 30
Level: 9
Location: Hamilton
Dates: Semester 2
17, 18 July, 21 September, 19 October

PRE-REQUISITES

HSIP807 Professional Practice in Context
HSIP805 Evidence and Inquiry in Practice
or HSIP808 Research for Practice

OVERVIEW

This module enables students to consolidate an advanced area of practice and engage in focused career development within health or social services. Students will focus on creative and reflexive learning strategies to develop more innovative, resilient and collaborative practice with a specific community or population. Evidence of practice development and proposed career pathway will be presented within an ePortfolio.

LEARNING OUTCOMES

- Articulate an advanced area of practice for a defined health or social practice population.
- Critically examine the potential for capability development and career advancement within a specific professional and service context.
- Develop strategies and resources for collaboration, teamwork and ongoing capability development in advanced professional roles.
- Engage in supervision and mentoring relationships to foster capability development within the interprofessional practice community.
- Use a reflexive approach to developing and maintaining a professional ePortfolio as a repository of evidence for practice development.

YOUR WORLD AT WINTEC - STUDY MADE EASY

STUDENT LEARNING SERVICES

If you need help with your studies, there's a team of people at Wintec whose job it is to provide that help. They offer one-to-one, small group and workshop sessions on topics such as returning to study, essay writing and study skills.

MĀORI AND PASIFIKA SUPPORT CULTURAL SUPERVISION

The Centre for Health and Social Practice Kaiāwhina offers dedicated support to our students identifying as Māori and Pasifika. Wintec also has an extensive Māori holding in the library. Te Kete Kōnae is a warm welcoming space that supports you, your whānau and staff at Wintec with academic and learning, financial, cultural, pastoral and counselling support. Email tkk@wintec.ac.nz.

For students who identify as Māori or who are undertaking research with Māori or Pasifika participants or within a Māori or Pasifika context, appropriate cultural supervision in relation to your research activities will be negotiated.

LIBRARY

There are two main libraries at Wintec providing a wide range of print and online resources material from books and specialist journals to DVDs, audiotapes and more. Resources can be sent to you if studying by distance learning or accessed online from any location.

RESEARCH RESOURCES

As a postgraduate student at Wintec, you will be well supported in your studies and research. Services include dedicated Postgraduate and Research offices. The Postgraduate Office administers all student research submissions and examinations, offers special workshops, and works closely with the Centre to keep track of your progress through the programme. The Research Office is the hub of research at Wintec and caters for both staff researchers and students.

COMPUTER ACCESS

Computers are available to all enrolled students at all Wintec campuses. The Gallagher Hub at our City campus has over 130 computers for you to use 24 hours a day, 7 days a week. The City campus also has wireless hotspots and IT helpdesks to assist with using the computers, printers, scanners and Mytec.

COMPUTER REQUIREMENTS

To access these web-enhanced or fully online modules, you are required to have access to/use:

- Windows 7 upwards
- Internet Explorer 9 upwards
(or Chrome/Mozilla Firefox/Safari)
- Microsoft Office 2010 upwards
- Windows Media Player
- Adobe Acrobat Reader
- An Anti-Virus programme
- Updated Flash version for video on YouTube

Ensure your device has the latest Microsoft Windows or Mac updates installed.

MyLearning is not responsive for Tablets and Smartphones. To achieve the best experience use Moodle via learning.wintec.ac.nz, or use a PC or laptop that has the latest versions of operating system and software.

MYLEARNING

Keep track of your timetable, check your emails, get your results, study online, do it all in one place, day or night, from anywhere, online in MyLearning.

MOODLE

Moodle is Wintec's online learning and teaching tool containing programme material which may include lecture notes, research material and practice tests. If you have a computer and an internet connection, you have Moodle at your fingertips, giving you the flexibility of studying from home or anywhere, anytime.

YOUR WELL-BEING

HEALTH WORKFORCE NEW ZEALAND

You may be eligible for Health Workforce New Zealand funding. Contact the HWNZ coordinator at your District Health Board for further details.

SCHOLARSHIPS

There are a wide variety of scholarships available to students wanting to do Postgraduate studies. For a full list of scholarships and information, please visit the website at: www.wintec.ac.nz.

DISABILITY SUPPORT SERVICES

At Wintec, you are provided with the opportunity to participate in your chosen course of study on equal terms. We offer advocacy, support and information for students with an impairment, including mobility parking permits, assistive software, support staff, reader/writer for exams, advocacy with funding agencies and much more. Contact the Disability Coordinator on 07 834 8800 ext 8815 or email sls@wintec.ac.nz to find out how we can help you.

CHILDCARE

Wondering how to juggle study and family? It's easy. Our childcare centre, Kidz@Wintec is located at the City Campus and provides care and education for children up to five years. Early booking is essential. Phone 07 834 8812.

HEALTH SERVICES AND COUNSELLING

Need a doctor? We have a Health Centre at our City campus with registered nurses, doctors, counsellors and chaplains to help with any health issues, including specialist health checks and free, confidential counselling.

TAKE YOUR NEXT STEP WITH WINTEC

CHOOSE YOUR MODULES

To discuss your pathway options within the programme and what modules would best complement your area of work, please feel free to contact the postgraduate team at pghsp@wintec.ac.nz.

READY TO APPLY

Once you've made a decision on what to study, there are several ways you can apply. You can go online to enrol at www.wintec.ac.nz/enrol or you can complete the Application to Enrol form and associated forms available from Wintec's Student Enrolment and Information Centre at the City or Rotokauri Campus. Forms are also available online: www.wintec.ac.nz/seic/pages/forms.aspx

If you are a first-time student at Wintec, you will also be required to provide a completed Additional Information form with a verified copy of your Passport or your Birth Certificate, a verified copy of your current Practising Certificate and a Payment By Third Party form if applicable.

If you need any assistance, contact the student enrolment information team on 0800 2 Wintec (0800 2 946832) or email info@wintec.ac.nz.

If you are a postgraduate student re-enrolling in the next module, you can simply go to www.wintec.ac.nz/seic/pages/returning.aspx to request the Returning Student Form. You will need to provide a verified copy of your current Practising Certificate and a Third Party Form if applicable.

CHECK

Check the Wintec website for scholarship options and check with your employer if your chosen modules will be funded. If you are HWNZ or employer-funded, be sure to complete a Payment By Third Party Form.

Send your application and documentation to Wintec: Freepost 566, Private Bag 3036, Hamilton 3240
