New Zealand

TRAINING INDUSTRY'S WORKFORCE

New Zealand's location on an active plate boundary has resulted in the development of numerous geothermal systems and a world-class geothermal energy resource. Our scientists and engineers pioneered the process of transforming the earth's natural thermal energy into commercial

reality, and a highly skilled workforce now keeps the wheels of industry turning. Wintec, an award winning Institute of Technology and one of this country's largest trade training centres, provides training for much of the workforce.

WINTEC ENERGY CENTRE OPERATOR TRAINING

- Thermal Operations
- Boiler Operations
- Process Operations
- Mechanical Engineering
- Electrical Engineering
- Bachelor of Engineering Technology
- Training for Trainers

GEOHERMAL'S TIME IS NOW

Located in the city of Hamilton, right on the doorstep of New Zealand's geothermal region, Wintec enjoys direct access to the industry's most progressive facilities and expertise.

Wintec works in collaboration with the University of Auckland's Geothermal Institute and our study programmes are developed together with New Zealand's leading geothermal energy generators including Mighty River Power and Contact Energy. The Wintec approach to learning is hands-on and relevant incorporating practical sessions alongside leading industry personnel. It is an approach that has earned Wintec an international reputation as a reliable provider of highly skilled, in-demand graduates.

FLEXIBLE DELIVERY

Wintec's training programmes are tailored to meet both industry specifications and individual client needs in content and delivery. Students gain an internationally recognised qualification and practical skills that enable them to lead the way in their chosen field.
